PROFILE SUMMARY

Aspiring Java Full Stack Developer with strong foundation in designing, developing, and deploying scalable web applications. Skilled in Java, Spring Boot, Hibernate, REST APIs, and modern front-end frameworks like Angular/React. Strong background in database design. Seeking an entry-level position to apply analytical skills and contribute to Results-driven decision making.

EDUCATION

University of Mumbai, Mumbai, MH
BSc in Computer Science
Year: 2024 | CGPA: 8.93
Relevant Coursework: Software Engineering, Operating Systems, Algorithms, Database Management, Computer Networks

Chembur Karnataka High School & Junior College, Mumbai, MH
Higher Secondary Education (Class XII),
Feb – 2019 | Percentage: 52%

PROFESSIONAL EXPERIENCE

Internship (Edunet Foundation) [**Certificate**] Remote
Full Stack Developer Intern Dec 2024 – Jan 2025

- Developing an e-commerce application using the MERN stack, integrating features like **user authentication**, **product listing**, **Wishlist**, and **inventory management.** Optimized API management techniques, resulting in a notable improvement in data retrieval speed.
- Collaborating with the team to build a responsive **frontend UI** using **React.js**
- Managing the backend using **Node.js** and **MongoDB** to ensure efficient data storage and retrieval.
- Implementing **RESTful APIs** for seamless communication between the frontend and backend.
- Optimizing performance by identifying and fixing issues related to responsiveness, page loading, and database queries.

TECHNICAL SKILLS

- Languages:**JavaScript(ES6+)**
- Front-end: **HTML5,CSS3, /React, Bootstrap.**
- Tools & Technologies: **Git, Github, VS Code, HopScotch**
- Deployment: **Vercel**

PROJECTS

E-commerce Website (MERN Stack)

- An e-commerce platform for a rich user experience.
- Developing a comprehensive e-commerce platform using the MERN stack
- Frontend fully completed using React.js with a responsive design
- Backend development in progress using Node.js and Express.js with features like user authentication and product catalog management

Weather App [Git] [live]

- A responsive weather forecasting app built using **React.js**.
- Integrated **OpenWeatherMap API** to fetch real-time weather data based on user input.
- Used **Axios** for API calls and managed component state with **React Hooks**.
- Implemented a clean and minimal UI with dynamic weather icons and temperature units.

CERTIFICATIONS & ACHIEVEMENTS

- JavaScript Essential – Jan 2026
- Web Development Essential – Dec 2025
